Art Unit: 2833

1. This is responsive to the amendment filed on April 21, 2004. Claim 1 has been amended. Thus, claims 1-20 are pending in this application.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beck (US Pat. No. 5,759,063).

Beck discloses all that which is claimed, except for the receiving portion is integrally connected to the housing (See fig.1 or 4). It would have been obvious to one having ordinary skill in the art at the time the invention was made that the receiving portion can be molded as an integral unit for easy assembly and effective. The court has held that forming in one - piece article that has formerly been formed in two pieces and put together involves only routine skill in the art. Howard v. Detroit Stove Works, 150 U.s. 164 (1893).

4. Claims 11-20 are allowed.

5. Applicant's arguments filed on April 21, 2004 have been fully considered but they are not persuasive.

Applicant argued that Beck fails to disclose the receiving portion is integrally connected to the housing as amended in claim 1. However, it would have been to one skilled artisan in the art at the time the invention was made that the receiving portion can be molded as an integral unit for easy assembly and effective. The court has held that forming in one - piece article that has formerly been formed in two pieces and put together involves only routine skill in the art. Howard v. Detroit Stove Works, 150 U.s. 164 (1893).

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
